Advances in Data Envelopment Analysis

Celebrating the 40th anniversary of Data Envelopment Analysis and the 100th anniversary of Professor Abraham Charnes' birthday

Guest editors:

Ali Emrouznejad, *Aston University, United Kingdom*

Rajiv Banker, *Temple University USA.*

Luka Neralic, *University of Zagreb, Croatia.*

The *European Journal of Operational Research (EJOR)* publishes high quality, original papers that contribute to the methodology of operational research (OR) and to the practice of decision making.

We invite high quality papers on Data Envelopment Analysis (DEA) for consideration for publication in a Feature Cluster of the European Journal of Operational Research (EJOR) designed to recognize the 100th birth anniversary of Abraham Charnes and the 40th anniversary of the publication of the seminal article on DEA in EJOR. The aim of this feature cluster is to publish state-of-the-art research papers spanning all areas of analytical and empirical research related to DEA. It will feature problem-oriented theory development and empirical analysis that has characterized DEA since its inception. Methodological advances, new models, empirical assessment and innovative case-studies are all welcome as long as the article provides significant new insights to advance the practice of DEA.
